# Minimum Viable Experience (MVE) Architecture

PRESTO accenture FJORD

The minimum viable experience (MVE) includes a subset of features from the Future State Vision for PRESTO Ticketing. The MVE describes the minimum features required to move towards a delightful and engaging customer experience. This architecture is the outcome of a collaborative effort between Accenture/Fjord and PRESTO teams.

The architecture is used during the planning of an experience, allowing designers to rapidly iterate on the flow of an experience. It visually describes the relationships between the processes in the future state and current state. This is an early version and is expected to undergo further revision as work continues.

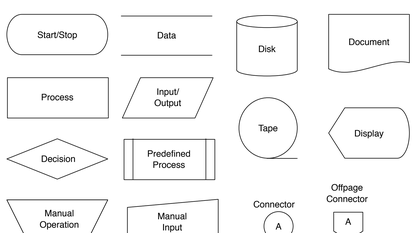
This architecture does not describe the expected first release (MVP) of this experience.

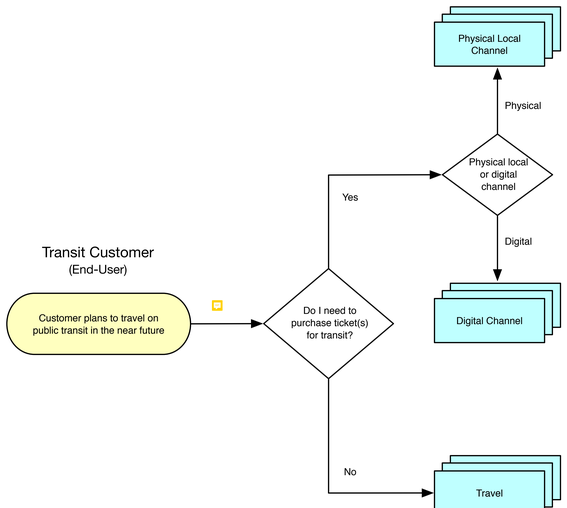
## LEGEND

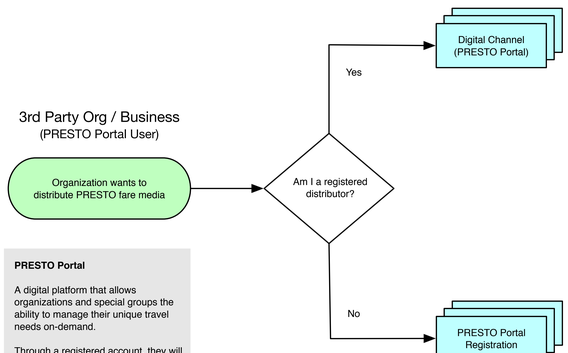
New part of experience

Enhancing existing experience

Entry/Exit flow



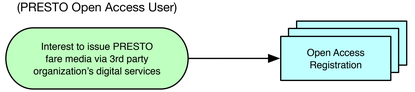




**PRESTO Portal**

A digital platform that allows organizations and special groups the ability to manage their unique travel needs on-demand.

Through a registered account, they will be able to purchase, manage and distribute PRESTO fare media to organized groups or affiliated individuals.



**PRESTO Open Access**

In an effort to decentralize the creation and distribution of PRESTO tickets, trusted 3rd party partners will be able to sell PRESTO fare media through the utilization of PRESTO APIs.
